

Online Medical Education - Cardiology / STEMI / ECG interpretation

1. MedMastery <https://www.medmastery.com>
 - Pros - High quality Physician level education
 - Wide variety of topics
 - AMA Category 1 CME; likely to be CAPCE accepted
 - Free trial, and first chapters are always free
 - Library includes "ECG Mastery: Yellow Belt", "Blue Belt" and "Black Belt"
 - Con - Relatively expensive (\$33-39/month)
 2. Life In The Fast Lane Blog <https://litfl.com>
 - Pros - Wide variety of educational resources, including a specific area for ECGs
 - Free
 - Links to a huge variety of other FOAM/Online resources
 - Con - no CME offered
 3. ECG Weekly
 - Pros - Case based discussions available at website as well as on social media
 - Reasonably priced - \$1/week, \$3/month, \$26/yr
 - Wide variety of formats - ECG cases, video reviews, etc.
 - CME - ACCME / AMA Cat 1 /ACGME
 - Con - no specific pathway from beginner to advanced; assumes a basic knowledge
 4. ECG Ninja www.ninja
 - Pros - Progressive learning from beginner to more advanced
 - Whiteboard presentations with a variety of supporting resources
 - Many lectures posted on YouTube
 - Con - Relatively expensive (\$50/3 months min.) for website access
 - No CME
 5. ECGAcademy <https://www.ecgacademy.com/index.html>
 - Pros - Extensive website with video lessons and ChalkTalks covering a broad range of cardiology topics
 - Free Introductory level
 - "MasterClass" - live educational sessions
 - Con - Status of CME is a little unclear
 - Majority of site is behind paywall, although fees start at \$5/month
- FOAMed Resources:
1. ECG Quiz www.ecg-quiz.com
 - >200 practice 12 leads
 2. #EM3 ECG Interpretation Quiz <https://em3.org.uk/induction/ecg-training>
 - Goals include recognizing different STEMI patterns
 3. ECGPedia - The ECG Course <https://en.ecgpedia.org/index.php?title=Introduction>
 - "Wikipedia for ECG" - wide variety of content including practice ECGs
 4. SkillStat <https://www.skillstat.com/tools/ecg-simulator/>
 - The primary site is for an education company, but the simulator is a free game to rapidly identify ECG rhythms
